ADDIPLAST GROUP

High performance global offer

RANGE

Our products range

ADDILENE®
Polyolefin

ADDINYL®
Polyamide

ADDITER®
Polyester - Styrenic

ADDIFLAM®
Fire resistance

ADDITEC®
ESD & Semi-conductive

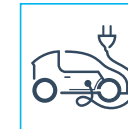

ADDIBIO RENEW®
Renewable & Sustainable

MATERIAL

Our basic polymers assortment

Styrenics		Polyolefins		Polyamides		Polyester		Polycarbonate	Polyacrylates		Other specialities	
ABS	ASA	PP	PE	PA	PA6	PET	PET-G	PC	PMMA	SMMA	PVDF	PARA
SAN	MABS	EVA		PA66	PA10	R-PET	PBT				POK	PPS
PS				PA11	PA12	PLA						
				PEBA	PPA							

MARKETS

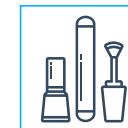

AUTOMOTIVE & MOBILITY

- Improvement of traditional and technical resins through the addition of colour, additives, fillers and various modifiers. Lightening by adding blowing agents, natural fillers.
- Interior & exterior applications.
- Under-bonnet mechanical parts.
- Partnership with the main resin producers. Approval process in place for the main automotive manufacturers as well as their subcontractors.

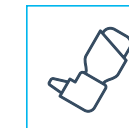

ELECTRICAL, ELECTRONICS, APPLIANCES & ENERGY

- Innovative technical solutions regarding ROHS and Halogen Free Flame Retardants (HFFR).
- UL94, VDE Approval.
- EN 45545 standard.
- Team of technical experts and fully equipped laboratory for specific tests.

COSMETICS

- «Piano black» deep black colour processed for substitution of paint and varnish.
- Range especially designed to meet the requirements of perceived quality, vacuum metallization and galvanization.

HEALTHCARE

- Range of compounds and additive concentrates for applications in medical dosage systems and pharmaceutical packaging sector.

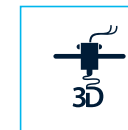

PACKAGING

- Wide range of standard and tailor-made additive concentrates, single & combined additives to add functionality to the plastic materials.
- Color masterbatches and compounds for industrial sector, rigid and flexible packaging market, BOPP.

CONSUMER GOODS

- Serving markets including household appliances, building & energy sector, sports and leisure equipment, toys, garden tools and many others.
- Large range of masterbatches and compounds for all standard and technical polymers.

3D-PRINTING

- Technical & tailor made compounds for high performance 3D-printing filaments.

SPECIFICITIES

Options for your custom compounds & masterbatches

SUSTAINABLE
Natural Fibers
Bio-based
Compostable
Biodegradable
PCR & PIR

FIRE RESISTANCE
Flame retardant RoHS
Flame retardant Halogen free
Flame retardant Synergist
Yellow card UL94

ADDITIVES & COMBINED
Permanent antistatic
Semi conductive / ESD
Antiscratch
Antiblock
Antioxydant
Anti UV
Antifog
Anti-odor
Slip agent
Processing Aid
Nucleation
Detectable
Heat resistance
Adhesive Tackifier

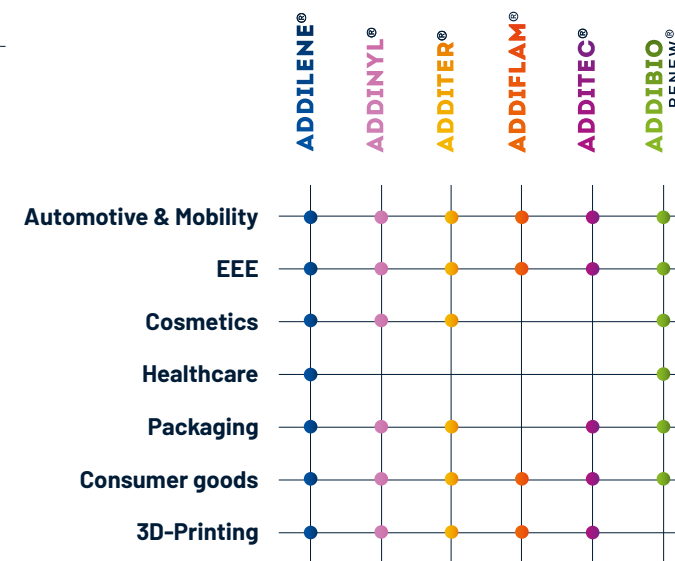

ASPECT
Coloration
Special Effect - Design
Diffusing effect
Glossy
Metallization
Galvanization

MECHANICS
High stiffness / rigidity
• Glass fibers
• Carbon fibers
• Natural fibers
• Mineral fillers
Impact-resistance
• Elastomers
• Block copolymers
• Plasticizers
• Core shells
• Alloys

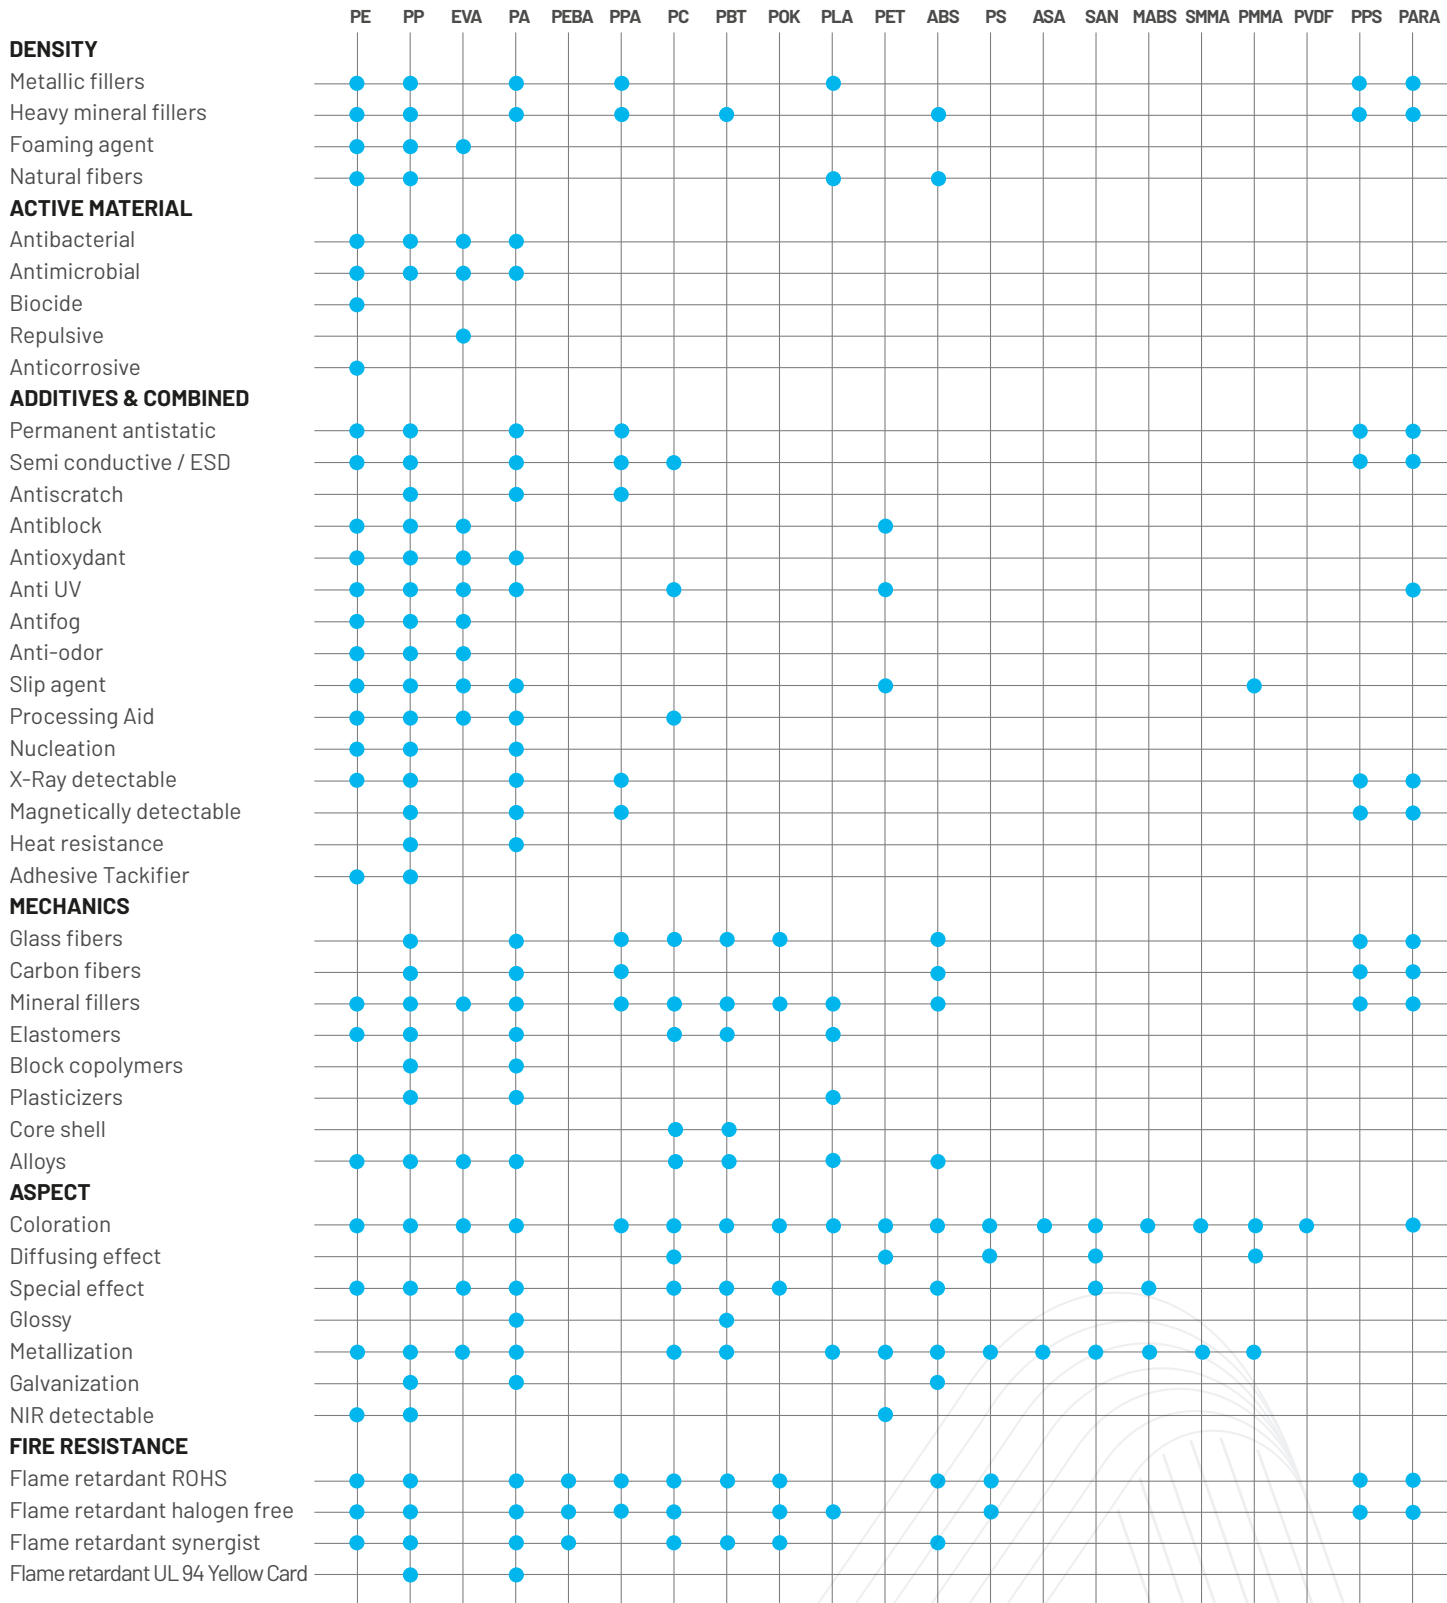

ACTIVE MATERIAL
Antibacterial
Antimicrobial
Biocide
Repulsive
Anticorrosive

DENSITY
High gravity
• Metallic fillers
• Heavy mineral fillers
Light weighting
• Natural fibers
• Foaming agent

APPLICATIONS
